

MOSS & MOONS

# Welcome, lovely!

*cozy planning with a little magic*

Thank you so much for your purchase. It truly means the world to a small shop like mine. Here's everything you need to start planning with a little magic.

## ■ On your iPad · GoodNotes or Notability

- 1 Download the file from Etsy: You -> Purchases & Reviews -> Download. Unzip the folder.
- 2 Open GoodNotes or Notability, then choose Import (or +) and pick the PDF marked "iPad".
- 3 Write right on it with your Apple Pencil. It works just like a notebook.
- 4 Tap the side tabs and links to jump between months and sections.

## ■ To print at home

- 1 Use the PDF marked "Letter" (US) or "A4" (rest of world).
- 2 In your print settings choose Actual Size / 100% (not "fit to page"), portrait.
- 3 Print as many pages as you like, then punch and pop them into a binder. Reuse forever!

# A few cozy tips

- These planners are undated, so start any time and reuse them year after year.
- In GoodNotes you can duplicate a page anytime you need another week or day.
- Hyperlinks and tabs work best in GoodNotes, Notability, and most PDF apps.
- Colors print beautifully, but black-and-white works too if you want to save ink.

## Need a hand?

If anything's unclear or a file won't open, just message me on Etsy. I'm a real person and I'll always help make it right. Happy buyers are everything to me.

## *a little thank-you*
